DETAILED ACTION

In response to an Amendment received on February 09, 2004.

Claims 1-10 are pending in this application. Claims 1, 2, 4 and 9 are independent claims.

The present title of the invention is "Internet moving image linking system and link recognition method".

The Group Art Unit of the Examiner case is now 2676. Please use the proper Art Unit number to help us serve you better.

Election/Restrictions

1. Due to amendment of the claims, the examiner is required to search in different subclasses. In consideration of enough time and effort will be required for a proper search, restriction is proper.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to judging the presence or absence of a link destination, classified in class 715, subclass 514.
 - II. Claims 2-3 and 9-10, drawn to link destination recognizer, classified in class 715, subclass 516.
 - III. Claims 4-8, drawn to image recognizer, classified in class 345, subclass 619.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as judging the presence or absence of a link destination. Invention II has separate utility such as link

destination recognizer. Invention III has separate utility such as image recognizer. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
